EDUCATION

- Velammal Vidhyashram - Mambakkam, Chennai, Tamil Nadu, 600127**

10 th CBSE Board:	year: 2021	score: 91.4 %
12 th CBSE Board:	year: 2023	score: 77.4 %
- Vellore Institute of Technology - Chennai - 600127**
BTech Computer Science and Engineering
Persuing: 3rd year Graduation year: 2027 CGPA: 8.23

TECHNICAL KNOWLEDGE

Programing languages: C, C++, Python, Java, Rust, Javascript, Html, CSS

Tools and Platforms: Linux, Docker, Kubernetes(minikube, kind), Nginx, AWS, MongoDB, PostgreSQL, MySQL, Socket Programming, Full Stack Web development, AI agents.

Frameworks: Langchain

PROJECTS

- Car Resale Website (Cars Now)**
Developed a comprehensive web application for buying and selling pre-owned vehicles with user authentication, vehicle listing, search functionality using PostgreSQL, JavaScript, HTML.
- Antivirus Software (TotalProtect AV)**
Built a security application capable of detecting and removing malware threats with on demand scanning, using virus hash tables containing sha256 and md5 hashes, cloud scanning with API.
- Video Chat Application**
Created a real-time video communication web application supporting multiple users with AgoraSDK, and JavaScript.
- AI Document Analyzer (AgentD)**
This is a document analyser software that uses generative AI to summarize and find insights on PDF documents.
This software uses Gemini API via LangChain to derive meaningfull insights on the pdf, generates flowcharts to show relations between entities described in the pdf content and also lets the user chat with the Gemini llm to clarify any doubts.

CERTIFICATIONS

- [AWS Associate Cloud Practitioner](#)
- [Introduction to Kubernetes](#)

EXPERIENCE

- Tried setting up and using Cloud Native tools like Drasi.
- Deployed Kubernetes clusters, Load balancers, Reverse proxies on my local machine.
- I have setup DNS server for the Local Area Network at my home, tried changing and adding network rules.
